

PVM Integrated Industry 4.0 Platform

Be at the Cutting Edge of Smart Manufacturing

DESCRIPTION

Industry 4.0 Digital Work Instructions platform makes it easy for companies & factories to throw out paper work instructions & transform into a digital factory. Embrace Industry 4.0, Save time and increase process control efficiency by connecting your workers to Smart Tools. The future of manufacturing rests within a connected worker platform. Leverage IoT technologies to automatically advance work instructions, capture data, and send program settings. Achieve Kaizen by promoting collaboration, eliminating waste, improving efficiency and maximizing productivity.

Streamline approvals with instant communication, Live - Centralized Production Traceability and Standardized Process. Achieve Faster Product Deployment with Built-in Quality in Production and Work Order Tracking.

SPECIFICATION

Plug and Play Usage - On hosted Cloud (Also available as On-premise deployment) SPC, Rule Engine, Reports, KPIs, Notifications and Alerts, API connectivity, API Customized Reporting, Easy Authentication (SSO), Global Control (Centralized Management), Open Protocol (Capture Torque Values), Andon Lights Communication and Test Bench Integration.

Supported Devices (IIoT):

Industry standard Scanners, Cameras, Foot Pedals, Buttons, Remote Controls, Measuring Devices, Smart tools, Machinery – Spot Weld, Hardware Insertion, Welding Robots, Injection moulding, Paint lines, Test Benches and Shop floor Computer systems.
